Name three odd, weird, or confusing things on or about the map.

Find three things that hint at the intended audience for this map.

Find three things that suggest bias by the cartographer.

Find three valuable pieces of information on the map.

Find three things to fact-check about this map.

Find three clues about how this map was intended to be used.

Find three things that tell you something about the mapmaker.

Choose three words to describe how this map makes you feel.

Name three design choices the author(s) made when creating this map.

Name three possible audiences for this map.

Name three possible reasons for making this map.

Find three things you could remove from the map without changing its meaning.

Note three things about the writing on the map.

Find three things that are persuasive about the map.

Name three things that are beautiful about the map.

Find three Wikipedia pages related to things on this map.

Name three things that could be the subject of this map.

Find three things to Google that could help explain this map.

List three possible answers to the question “what is this map about?”

List three ways this map could be used as propaganda.

Name three different roles, jobs, or sets of skills required to produce this map.

Suggest three changes that could make this map more useful.

Whose names
are on the
map, if any?
Try to find out
something
about them.

Try to find a
another map
of the same
place and
time online.

Note three
aesthetic choices
made on the
map and say
what you like or
don't like about
them.

Find three
details in the
map that make
you ask
“why the heck
is this on
here?”.

Describe three
ways people
are depicted
(or not)
on the map.

Compare two
maps.
Give three
reasons why
one is more
credible than
the other.

Choose two
maps with
different
physical
properties and
describe three
differences.

Choose two
maps and
compare their
details and
decorations.

Find two maps
intended for
very different
audiences and
describe those
audiences.

Choose two maps.
Which one
suggests more
bias by the
cartographer?
Explain why.

Pick two maps
and compare
clues about
how they were
intended
to be used.

Pick two maps
with opposite
vibes and
describe
the vibes.

Choose two
maps.
Propose
improvements
to one based on
qualities
of the other.

Choose two
maps and
compare the
use of text on
them.

Choose two
maps.
Guess which
one you think
was harder to
make, and
explain why.

Choose two
maps and
compare the
value of the
information they
contain.

Choose two
maps and
compare the
way people are
represented
(or not).

Choose three
maps.
Rank them by
how factual they
seem and
say why.

Choose three maps.
Rank them in order of the value of their information.

Pick three maps with something in common and describe their similarities.

Come up with a hypothetical argument that the map could help prove.

Try to find another map by the same author online.

Choose the weirdest map in the group and describe what you find strange about it.
